**CEMEX LATAM HOLDINGS, S.A.
INFORMS:**

BOGOTA, D.C. SEPTEMBER 3, 2019. CEMEX Latam Holdings, S.A. informs that its indirect subsidiary, CEMEX Colombia S.A. (CEMEX Colombia) reported to the market that it has been notified of the favorable decision issued by the Corantioquia Board of Directors to approve through the Agreement No. 567 the removal from the Integrated Management District of the Renewable Natural Resources Alicante River Canyon (DMI), of an area of 169.2 hectares of the municipality of Maceo where the cement plant built by CEMEX Colombia is located,(the “Cement Plant”).

The authorization issued represents a relevant step forward to achieve the commissioning of the Cement Plant, allowing the continuation of the pending procedures to obtain the permits with the competent authorities, such as: (i) the modification of the environmental license to allow the production of at least 950.000 metric tons of cement per year, (ii) the modification of the land use permit allowing Industrial and Mining Use, and (iii) the obtaining of the permits to complete the construction of several segments of the access road to the Cement Plant.

CEMEX Colombia will be responsible of managing the execution of the environmental compensations requested by the Corantioquia Board of Directors, reaffirming its commitment to generate development, employment and community welfare, by preserving the ecosystem and the environment, contributing, in this case, to the economic and social development of an area historically impacted by violence, such as the municipality of Maceo.
